
Test Plan

Product Name: nopCommerce (Frontend)

Prepared by: Surbhi Singh

1. PROJECT OVERVIEW

This project focuses on manually testing the nopCommerce e-commerce website.

The purpose of testing is to check whether the main features of the website work as expected and to identify and report defects found during testing.

2. TESTING OBJECTIVES

The main objectives are:

- Verify important website features.
- Check common user flows.
- Test valid and invalid inputs.
- Identify and report defects.
- Execute and document test cases.

3. APPLICATION UNDER TEST

Application: nopCommerce

Application Type: E-commerce website

Application URL: <https://demo.nopcommerce.com>

Testing Type: Manual Testing

Environment: Web browser

4. SCOPE

INCLUSIONS

- Registration

-
- Login
 - Shopping Cart
 - Wishlist

EXCLUSIONS

- All the features except that are mentioned under 'Inclusions'
- Database Testing
- API Testing
- Automation Testing
- Performance/Security/Load/Source Code Testing

5. TESTING APPROACH

The following activities will be carried out:

1. Identify test scenarios.
2. Write test cases.
3. Prepare test data.
4. Execute test cases.
5. Record Pass/Fail results.
6. Report defects.
7. Retest defects where applicable.

6. TEST DATA

Dummy test data will be used for testing, such as:

- Test names
- Test email addresses
- Test passwords

Real personal or sensitive information will not be used.

7. TEST DELIVERABLES

- Test Plan
- Test Scenarios
- Test Cases
- Bug Reports

-
- Test Summary

8. ENTRY CRITERIA

Testing will begin when:

- The application is accessible.
- The main features are available for testing.
- Required test data is prepared.
- Test cases are ready for execution.

9. EXIT CRITERIA

Testing will be completed when the planned test cases have been executed and identified defects have been documented.

10. DEFECT REPORTING

Any reproducible issue found during testing will be reported with:

- Bug ID
- Bug Title
- Module
- Steps to Reproduce
- Expected Result
- Actual Result
- Severity
- Priority

11. TOOLS USED

- Google Chrome
- Google Sheets
- Google Docs
- GitHub

15. PROJECT OUTCOME

The project will provide documented test cases, test execution results, and bug reports demonstrating the manual testing process followed for the nopCommerce website.
